

# Global Test of English Communication (GTEC)

## Assess all four language skills with a unique online proficiency test.

### Measure speaking, listening, reading and writing online.

The GTEC (Global Test of English Communication) is currently the only online business-related English proficiency test that assesses up to four language skills—speaking, listening, reading and writing—or any combination of two. Developed by Berlitz, in association with Benesse Corporation, the GTEC uses sophisticated technology to quickly and accurately measure English proficiency online. Test results provide valuable information about an individual's ability to communicate in English in a business environment according to specific language skills.

### Corporate Test Editions

GTEC Corporate Test Editions offer business professionals the convenience of assessing their employees' English Proficiency online, when and where they choose. The GTEC Corporate Test Editions are available in four configurations, allowing organizations to select a test according to the specific language skills that are most relevant to their situation.

- 4-Skill Test: Speaking, Listening, Reading and Writing
- 2-Skill Test: Listening and Reading
- 2-Skill Test: Speaking and Listening
- 2-Skill Test: Reading and Writing

GTEC Test Configuration	Test Length	Results Turnaround
<b>4-Skill:</b> Speaking, Listening, Reading, and Writing	80 minutes	2 weeks**
<b>2-Skill:</b> Listening and Reading	40 minutes	immediate
